

# **Glen Lake Fire Department 2017 Annual Report**

[www.glenlakefire.org](http://www.glenlakefire.org)

## Chief's Page

The Department's 2017 annual report is a summary of the many services the Department provides to our community. We strive to serve the Glen Arbor and Empire Township communities, with their many visitors, with quality and personal care every time we interact with our customers.

Due to several staffing changes, opportunity for promotion was opened in the Department. Chad Dykgraaf and Aaron Brown were promoted to Lieutenant after participation in a competitive examination process. This was an important milestone in the Department. These experienced employees assumed greater responsibility and can now apply their experience and training to their new positions. The Department also hired four new firefighters this year. The new employees have applied themselves to their new positions with diligence.

We strive to maintain a modern forward-looking fire department. This is often difficult in a rural setting where the need for advanced equipment and training is not always readily apparent and where budgetary factors can limit acquisition of better technologies. We do not want our services to plateau by not maintaining currency in equipment and training. Nor do we want to fall behind and be unable to render the best service. I thank my officers and staff for their hard work and willingness to take on new tasks. I also thank the citizens and elected bodies of Glen Arbor and Empire Townships for their willingness to provide the necessary funding for this important work.

As it has always been, my goal is to provide a safe work environment and to send each employee home healthy after every shift. To this end, we emphasize personal fitness, professional education, and continuing practical training. Utilizing these goals, we make every effort to provide professional and compassionate care to everyone we interact with in our work. You are invited to visit our stations. The staff will give you a tour and explain what we do to protect your life and property every day of the year.

A handwritten signature in black ink that reads "John A. Dodson". The signature is written in a cursive, flowing style.

John A. Dodson  
Chief of the Department

## Oversight

The Glen Arbor Township Board utilizes an advisory body, the Emergency Services Advisory Commission (ESAC), to keep it apprised on issues related to fire and EMS operations in the two-township coverage area. The Commission reviews finances and hears operational reports. It then reports on its discussions to the Township Board and makes recommendations for Board action.

The Glen Arbor Township Emergency Services Advisory Commission's seven-member volunteer infrastructure is comprised as follows:

# Department Organization

## Personnel

### Administration

#### **John A. Dodson**

Chief of the Department

#### **John Kenney**

Aide to the Chief

#### **Robert Wurst**

Executive Assistant to the Chief

### Operations Officers

#### **Lt. Aaron Brown**

- Fire Suppression
- Apparatus Maintenance
- Pre-Plans and Inspections
- Urban Interface
- Buildings & Grounds

#### **Lt. Chad Dykgraaf**

- Training Officer
- Public Education
- Technical Calibration
- Asset Management

#### **Lt. Bryan Ferguson**

- Pre-Hospital Care
- Rescue/Marine operations
- Cost Recovery
- HazMat Mitigation

#### **FF Nathan Perdue, Safety Officer**

- FF Accountability
- Rapid Intervention
- OSHA Compliance
- Annual inspections

### Shift Organization

#### **A Shift**

Lt. Bryan Ferguson, FF/Paramedic (10)  
Douglas Lake, FF/EMT (10)  
Zachary Yanska, FF/Paramedic (6)  
Chase Showers, FF/EMT (0)

#### **C Shift**

Lt. Aaron Brown, FF/Paramedic (9)  
Jay Morse, FF/Paramedic-IC (9)  
Pablo Cevallos, FF/EMT (6)  
Gage Agin, FF/EMT (0)

#### **B Shift**

Lt. Chad Dykgraaf, FF/EMT (7)  
Steven Lienard, FF/Paramedic (6)  
Matthew Durand, FF/Paramedic (5)  
Nate Perdue, FF/EMT (2)  
Steven Rang, FF/EMT (0)

#### **Paid On Call**

Eric Dubord, FF/EMT  
John Friend, FF  
Tim Nichols, FF/EMT  
Bill Parker, FF/EMT  
Dena Smith, FF/Paramedic-IC  
Peter Stern, FF/EMT  
Jim Wendels, FF/EMT

The Department very much appreciates the efforts of its Paid On Call (POC) employees and the extra effort they put in as members of the community. Their loyalty to the Department over the years is commendable and noteworthy.

*The number in parentheses is years of service as a full-time employee (as of 12/31/2017) of the Department. Some personnel, especially some Paid On Call staff, have extensive years of service with the Department or with other departments.*

## Station information

### Station 1 – Glen Arbor

Station 1 is located at 6401 W. State Street, Glen Arbor. It houses one Advanced Life Support ambulance, one ladder truck, one engine, two tankers, a command car, a utility truck, and the

Fire/Rescue boat. Station 1 services the northern area of the Glen Arbor-Empire area. In addition to residences, it protects many well-known structures such as the Homestead, Le Bear Resort, and the Sleeping Bear Dune Climb. The station is staffed with a Lieutenant, a Firefighter/Paramedic, and up to two Firefighter/EMT's. The Fire Chief and the Executive Assistant are also located at this station.

### Station 2 – Empire

Station 2 is located at 11530 S. Lacore Road, Empire. It houses one Advanced Life Support ambulance, the heavy rescue truck, an engine, and a tanker. Station 2 services the southern portion of the Empire-Glen Arbor area. In addition to the residences and businesses located in Empire Village, it also protects the Cherry Republic warehouse, the National Park headquarters, and the Pierce Stocking Drive Overlooks. Station 2 is staffed by a Firefighter/Paramedic and a Firefighter/EMT.

### Special Area Considerations

The National Lakeshore does not provide EMS services to its customers but relies on the Glen Lake Fire Department for its emergency medical responses. The Department responds to all medical emergencies in the park as well as providing swift search and rescue capabilities for persons who are lost or are in distress. Both stations respond to emergencies and other calls for service in the National Lakeshore. Responses in the Lakeshore require a much higher personnel and equipment response than other responses in the Department's service area.

The Department also responds to incidents on South Manitou Island and marine emergencies in Lake Michigan. The Department has an agreement with Leland Fire Department to aid in marine firefighting operations. The Fire Rescue boat (371) is crewed by the staff of the Department. It is capable of open water search and rescue, transport of EMS personnel and patients, and firefighting both inshore and on the open water.

## **Buildings and Grounds**

Maintenance and repairs for the Empire and Glen Arbor stations are performed by Department staff and qualified contractors. Station 1, Glen Arbor, was constructed fourteen years ago. It is in very good condition. It receives regular preventative care, but the aging facility is requiring increasing contractor support for more complex repairs. 2017 did not see any unexpected major repairs but saw quite a bit of regular maintenance on the facilities.

The following is a summary of the major items resolved this year:

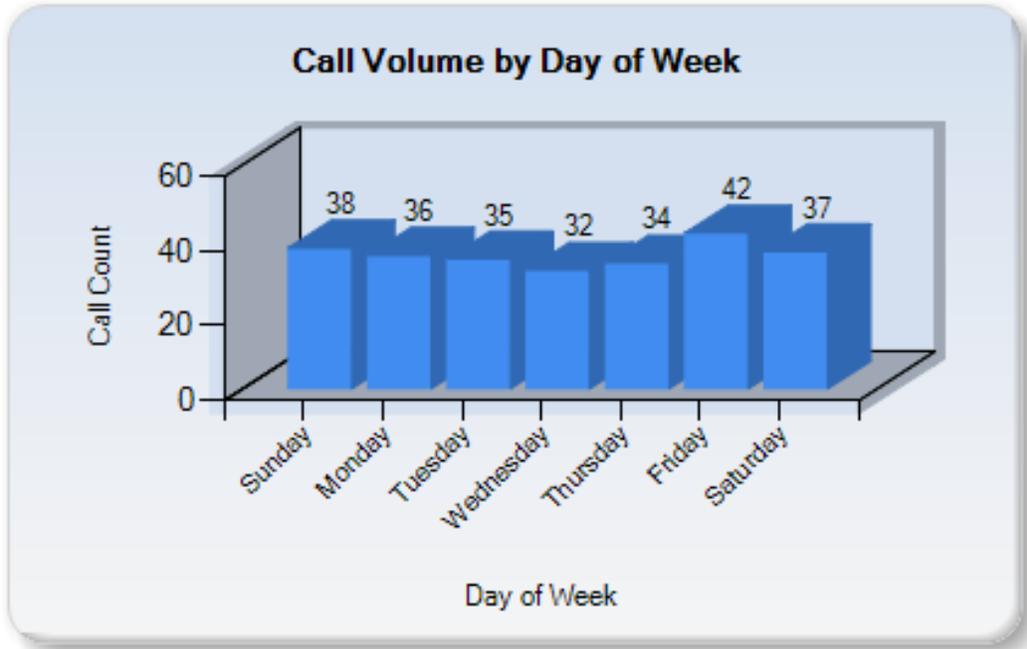

- Snow removal keeps the staff busy during the winter. Utility 381 is used for plowing snow at Station 1. Empire Village DPW removes the snow at Station 2.
- Landscape rock was put in place around Station 1 in the summer. This replaced the use of mulch and the weeding that required significant attention.
- All EXIT light signs between both stations were refurbished with new batteries.
- The water softener required several visits from the service company to correct continuing troubles with water quality.
- The metal exterior entrance doors at Station 1 were repaired so they would not have interference with the floor.
- New smoke detectors were installed at Station 2.
- Northern Garage Door performed a 25-point service inspection on garage doors at both stations. One door required repair and 8 garage doors had faulty air switches replaced.

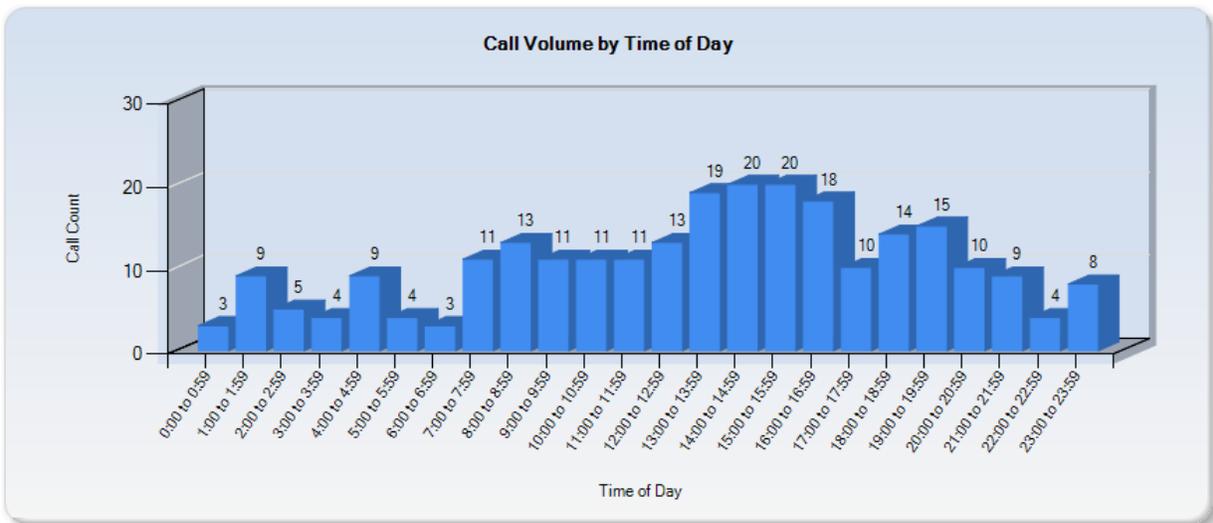

The Department staff is also constructing uniform lockers for Station 2. That station has very limited storage space. The project will allow employees to store uniforms and bedding in the living space in an orderly way. This will help improve living conditions at that station.

# 2017 Operational Statistics

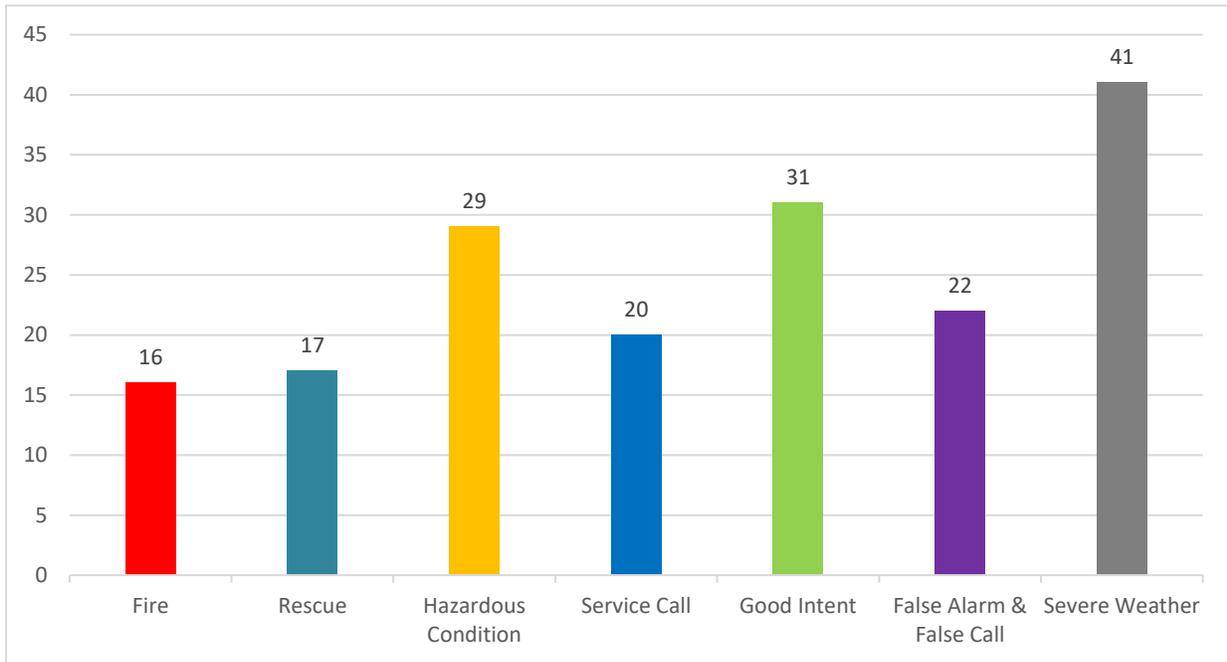

## EMS Call Volume by Day of the Week

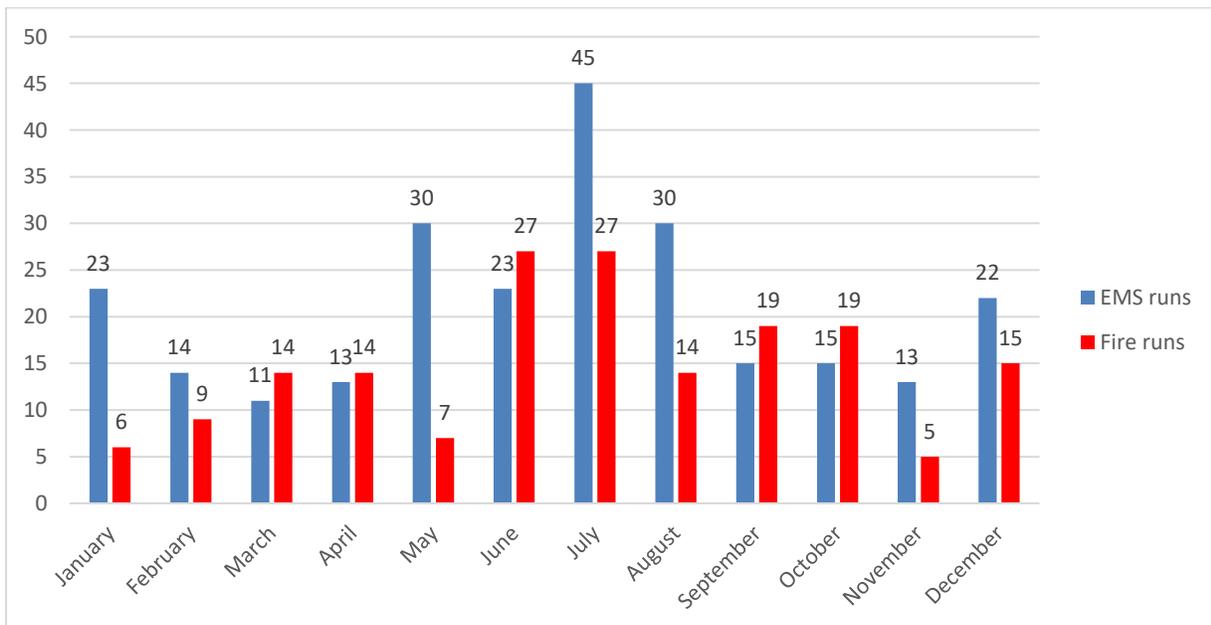

## EMS Call Volume by Time of Day

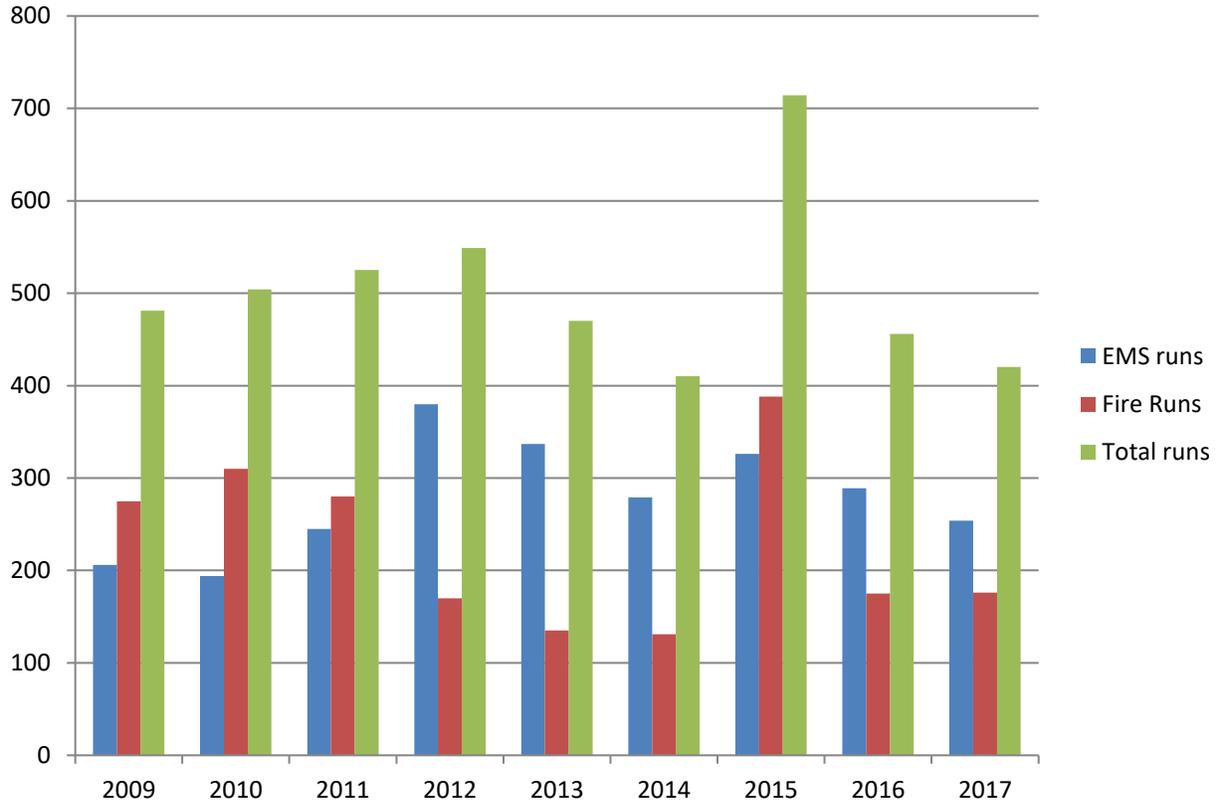

## 2017 Fire Incidents by Type

## 2017 EMS and Fire Monthly Run Volume

## Annual Run Volume Comparison

\* 2015 - 191 fire runs were due to 2015 storm

## Operations

### FIRE

Fire run volume was 176 for 2017 which is about the same as last year. The summer months continue to be a busier time of year due to the influx of visitors and the return of seasonal residents during those months.

Crews responded to the usual calls including structure fires, wildland fires, vehicle extrication, search & rescue, and rope rescues.

In 2017, the Department purchased new four-gas monitors to replace failing older units. These specialized monitors detect carbon monoxide and other dangerous gases. They also warn of explosive vapors present during a fire or when some equipment experiences a failure.

A new chainsaw for Ladder 331 was procured to replace a failed older saw.

The dry hydrant at the Little Glen Lake boat launch was damaged last winter. The Department arranged for it to be repaired with a steel pipe instead of the original plastic pipe. It is planned to mark the end of the pipe with a buoy so that boaters do not hit and damage it.

### Vehicle Maintenance

2017 was an average year for maintenance and repair for the Department fleet of vehicles. The fleet is aging and requires increasing attention and repair. Fire and EMS apparatus are complex pieces of equipment. In addition to the standard heavy truck components, the apparatus utilizes specialized equipment, rescue gear, and complex electronics. It is important to conduct preventative maintenance to find problems before they develop. Much routine maintenance is performed in-house to control repair costs. It is normal for complex repairs to be performed at shops that specialize in heavy vehicle repair.

The past year again saw the need for several repairs. A summary of these repairs is listed below:

- Engine 311 needed replacement of electronic modules and repair to the foam delivery system
- Rescue 251 was sent in for oil leak repair and annual maintenance
- Various gauges were replaced on fire apparatus
- LED scene lights were installed on Ambulance 391
- Ambulance 391 transmission leak, rear suspension, and other minor issues were repaired
- Boat 371 navigation mast, radio antenna, and door were repaired after damage in high seas

To further protect the Township's apparatus fleet, the Department is instituting an advanced preventative maintenance program on its large apparatus. Pioneer Diesel in Traverse City will perform regular maintenance checks and service on all the major apparatus. Smaller vehicles will continue to be serviced locally.

## EMS and RESCUE

**EMS**

The Department's EMS call volume remained about the same as in previous years. Calls for service decreased by 40 from the previous year. The department responded to 254 medical incidents this year.

Ambulance 292 saw its first full year of service. It was not out of service for any period except for routine maintenance. Its four-wheel drive system made access to difficult home locations in the winter months much easier. With both primary ambulances performing well, the Department determined that the backup ambulance (Unit 392, purchased in 1998) was no longer required. That unit was sold during the year.

Early in the year, the Department requested bids for new cardiac monitor/defibrillators as part of its capital replacement process. The process ensures that equipment is kept up to current standards and decreases repair time due to aging equipment. The bid for cardiac monitors was awarded to Zoll Medical. Three X-Series cardiac monitors and 9 new Automated External Defibrillators (AED) were purchased to replace ten-year old models. The new monitors allow wireless transfer of patient information to our reporting software and also to the hospital for enhanced better patient care.

Throughout the year, several vendors demonstrated emergency ventilators and IV pumps to the staff. These items will be purchased in early 2018 to increase patient safety and comfort while transporting them to Munson Hospital in Traverse City.

## MARINE

Fire-Rescue boat 371 responded to 9 marine incidents in 2017. Most incidents that the department responds to on the water are vessels/persons in distress. Many times, United States Coast Guard vessels and aircraft and the Leelanau County Sheriff's Department assist in the effort.

Seven of the marine incidents this year were quite lengthy in duration. All had positive outcomes.

During a night response, Fire Rescue Boat 371 suffered extensive damage in rough seas when a pin failed in the mast above the cabin and the mast came loose and broke several items. Personnel were able to navigate back safely to the dock without the use of the navigational radar due to the training they undergo throughout the year.

## TRAINING

The Training Division is responsible for conducting and scheduling most of the Department training. In-service training is accomplished in several ways, including: outside instructors, on-duty shift training, monthly staff training, in-house and on the water training. Personnel are also sent to classes and conferences outside of the Department for specialized training. All Department training is done in compliance with standards established by the Michigan Firefighting Training Council (MFFTC) and the National Fire Protection Association (NFPA).

Highlighted course delivery from 2017:

- Ice Rescue Training completed in conjunction with USCG personnel.
- Annual HAZMAT refresher training
- Alligator Hill sand table exercise with NPS and Indian Dunes personnel.
- County Tornado Drill at The Leelanau School
- Sand dune operations with NPS
- Annual drivers training update
- Vehicle stabilization and extrication
- Tanker operations
- MI-PEERS study (Michigan Pediatric EMS Errors Reduction Study)

General weekly training is extensive and covers all the topics with which firefighters need to be familiar. Overall, Department staff accumulated 2225 training hours in 2017.

## ASSETS

In 2017, the Department replaced three different pieces of equipment due to age, lack of replacement parts, lower cost of use, and cleanliness. All three assets are frequently used and vital to patient health and life safety. The new assets are: Zoll X series cardiac monitors, Optium EZ glucometers, and MX4 gas meters.

The Zoll X series cardiac monitors have replaced the nearly 10-year-old MRX monitors. The MRX units were scheduled for replacement due to age and increasing repair costs.

The new glucometers cost less to purchase and operate than the previous units. Optium EZ testing strips come individually wrapped and are not subject to contamination. This also reduces waste due to bulk containers of test strips expiring before they could be used.

The new gas meters replaced the old M-40 multi gas detector which had become obsolete. The MX4 can test atmospheric levels of oxygen, carbon monoxide, hydrogen sulfide, and Lower Explosive Limits (LEL) of explosive gases such as methane, propane, and hydrogen.

## **SAFETY**

The Department strives to protect the health and well-being of all its employees. Every year all firefighters undergo an annual physical to monitor their health. The department utilizes The Walk-In Clinic in Traverse City for its physical testing. The Department physician, Dr. Springsteen, provides NFPA-compliant firefighter exams which are very rigorous. Because firefighting can be a very strenuous job, performing these tests certifies that the staff is fit to perform its work and gives feedback to monitor ongoing health of each person. Staff must successfully pass the physical testing to maintain certification for employment.

Early in 2017, the Department received a 2% disbursement from the Grand Traverse Band of Ottawa and Chippewa Indians for personnel tool bags. The bags contain several items that can be utilized while on fire and EMS calls. Each bag contains a stethoscope, rescue shears, oxygen tank wrench, LED penlight, ALS/BLS EMS Guidebooks, and a Leatherman tool among other things. Some employees have added water and food items to their bags for the longer calls while others have added even more safety equipment such as eye protection and hearing protection.

Each year all ground ladders undergo required load-bearing and damage tests to make sure they are in proper working condition. Aside from a failed rung on an extension ladder, all ladders once again passed inspection. That rung is being replaced and the ladder will be returned to service. The aerial on Ladder 331 was also tested again this year and, aside from some preventative maintenance, the testing was satisfactory. All fire hose is annually tested to ensure proper safety during use.

The Department's Self Contained Breathing Apparatus (SCBA) were flow-tested and inspected in 2017. Proper testing on these items ensure that firefighters are safe in smoke and fire conditions. Aside from one air pack, all tests came back positive once again. The faulty air pack was sent in for repair and was returned to service.

The Department continues to provide additional safety items for the staff. It has purchased gear bags for storage of employee's turnout gear. These bags are used to store their gear while they transfer shifts between Station 1 and 2. These bags provide protection from the gases and grime that can adhere to turnout equipment in a fire. It also allows the gear to be kept organized in one place.

## **Radios and Pagers**

In 2017, Leelanau County procured an 800 MHz radio and paging system. This new system replaced an aging VHF system. Each department in the county received new portable radios and pagers. Each firefighter received a new radio, pager, and charging station. Every apparatus also received an 800MHz mounted mobile radio.

## Community Services

### Public Education

In 2017, the Glen Lake Fire Department had an excellent year for Public Education as we were able to again offer American Heart Association courses. These courses teach lifesaving CPR and First Aid techniques. These courses were attended by our entire staff, as well as staff and students from the following organizations and businesses: Sleeping Bear Dunes National Lakeshore, The Leelanau School, Homestead Resort, Grand Traverse Area Catholic Schools, Glen Lake Community Schools, Munson Medical Center, Siddall Dentistry, Interlochen Center for the Arts, BLU restaurant, Manitou Transit, and Northwest Regional Firefighter Training Center. Several private citizens took the time to learn these lifesaving skills as well. In all, 112 people participated in these courses. The Department is continually looking to educate the citizens that we serve and protect. Please let us share these invaluable lessons with you or your group. Contact the Department to schedule your course today.

### Home Safety Surveys

The Department is available to schedule home or business visits to conduct a safety survey. Firefighters will suggest ways to improve fire safety at your home or business. There is no penalty if correctable items are found. The survey of your home or business will only recommend ways to improve safety. The survey involves all parts of the property and includes: kitchen, bathroom, bedrooms, home heating equipment and chimneys, smoke detectors, ingress/egress, fall hazards, outdoor areas, and a building escape plan.

### Ongoing Public Education/Speaking

Did you know the Department offers many different classes for interested citizens? Feel free to contact the Department with any questions regarding individual or group training or for speaking events. The Department has qualified instructors in many areas: fire safety, CPR, First Aid, and Safe Boating. The Department can often provide these classes at minimal or no cost.

### Community Outreach Program

All communities have individuals that are part of a vulnerable population due to isolation, aging, health risks, and many other factors. Glen Arbor and Empire Townships are no different. The Department is concerned about community health and would offers help with checking on the welfare of an individual or following up with a patient after a hospital stay. Call if you have questions at 334-3279.

### Call 911 FOR EMERGENCIES

We encourage everyone to **call 9-1-1** when they need help. Stations in Empire and Glen Arbor are staffed every day, but crews may be away from the stations assisting other residents or training. Do not rely on calling the fire station for help. **Call 9-1-1** to save precious time by using the emergency dispatch system. The duty staff will receive notice of your assistance request even when they are away from the station.

Detailed information about Department resources, public programs, frequently asked questions, training, and more can be found on the Department website ([www.glenlakefire.org](http://www.glenlakefire.org)).

## **Administration**

Every organization has various administrative matters to attend to in its operations. Most of them are very routine. This year, the following major items were accomplished:

- Annual budget was analyzed and prepared. The Department performed well in the annual Township financial audit. It held expenses below budget again this fiscal year.
- Three firefighters left Department employment in 2017. Two part-time personnel resigned due to union rules regarding dual employment in union-represented fire departments. As a result, the Department hired several firefighters during the year: Mike Winter, Chase Showers, Steve Rang, and Gage Agin.
- Two personnel were promoted to officer positions this year. Chad Dykgraaf and Aaron Brown completed the competitive process and were promoted to Lieutenant.
- FF Nathan Perdue was appointed Safety Officer after Lt. Brown's promotion.
- Ambulance 392 was sold.
- ISO renewed its ratings for Glen Arbor and Empire Townships. The Homestead and Village of Empire received a rating of 5 (rating stayed the same). Other areas received a 6 (improved from 7). A portion of Empire Township continues to be rated at 10 (areas where a residence is greater than 5 miles from a fire station).
- Empire Township requested an assessment of Station 2 and possible solutions to enhance fire protection and EMS coverage in the Township. The report took several months to complete and was issued early in 2018.
- Department received State of Michigan EMS agency and Medicare recertifications.
- A maintenance agreement with D&W Mechanical was signed to help ensure long life for heating and cooling components at both stations.

## **Glen Lake Fire and Rescue Association (GLFRA)**

This year, the GLFRA continued its long-time support of the Department in several ways. First, it is supporting, as in the past, advanced education for Department employees. If the employee successfully completes the program, he will be eligible to enter the Department's Probationary Paramedic program and be eligible for hire as a Paramedic when a slot becomes open.

GLFRA also sponsors special events for the Department. The 2017 Open House event was held at Station 1 on July 29 with another great year of good weather and community participation. Many people attended from in and around the community. A light lunch and activities were available for all ages ranging from puzzles, obstacle course, and truck tours. Station 2 also hosts an Open House during the Empire Heritage Days.

GLFRA also hosted the annual 9-11 Commemoration event. The keynote speaker was Michigan State Police Captain Chris A. Kelenski, Deputy State Director of Emergency Management and Homeland Security. The Commemoration continues to enjoy support from the community and was well attended as usual.

If you would like more information or wish to donate to support its programs, please contact GLFRA at: *Glen Lake Fire and Rescue Association, PO Box 417, Glen Arbor, MI 49636*

The GLFRA is a wholly separate organization from the Glen Lake Fire Department. It is a 501(c)(3) charitable organization whose purpose is to support the Department apart from the Township tax-funded budget.

## **Community Support**

Customer service is the cornerstone of the Department and the reason for its continued work. We strive to provide professional and compassionate care to everyone we meet.

*“This note is a heartfelt “THANK YOU” for your quick response and professionalism while attending to me at the scene and to Munson Hospital. Words cannot express how grateful I and my family are for your help that day.”*

*“Your presence and participation as Honor Guard for the July 4 Flag raising at Old Settlers added meaning to this event.”*

*“All...the...Rescue personnel displayed exceptionally professional skill and kindness in the performance of every phase of their activities relating to rendering assistance...which reflects highly upon themselves and the respective elements of the 911 rescue component which they serve.”*

The Department thanks everyone in the community who writes to express appreciation and thanks. The staff enjoys its work and is glad that they can be of service to you.

## **Closing note**

The 2017 Glen Lake Fire Department annual report was written and printed to assist the citizens and visitors of Glen Arbor and Empire Townships. It provides a basic review of the Department's activities throughout the last year. It also serves as an addendum to the reports published and the events hosted each year. Should you have any questions or comments about this report, the Department's activity, or how we could better serve you, please do not hesitate to contact us.

## FREQUENTLY ASKED QUESTIONS

### HOW DO I GET A COPY OF A MEDICAL OR FIRE REPORT?

Call the Department at 231-334-3279 during business hours to obtain procedures for obtaining a report. The website, [www.glenlakefire.org](http://www.glenlakefire.org), also has the appropriate forms available for requesting a report.

### WHO DO I CALL TO LEARN CPR?

Call the Department at 231-334-3279 and ask for the Training Officer.

### WHAT SHOULD I DO WITH HOT FIREPLACE ASHES?

Do NOT remove hot ashes from the fireplace immediately. Wait 2-3 days and let the ashes cool completely in the fireplace. Make sure there are no hot embers before removing the ashes. Place cool ash in a metal container with a lid and store them away from the home and all combustible material.

### WHERE SHOULD I PLACE SMOKE ALARMS IN MY HOME?

Homeowners should install smoke alarms on every level of their home and outside of all bedrooms or sleeping areas. Smoke alarms should also be installed inside every bedroom or area where people sleep. Call the Department for a free home safety survey!

### LIFE SAFETY TIPS

- ✓ Store matches and lighters away from children
- ✓ Check electrical cords for cracking and fraying
- ✓ Create a home escape plan in event of an emergency
- ✓ Install and maintain smoke and carbon monoxide (CO) detectors in your home
- ✓ When using candles in the home, keep them away from combustible materials and make sure to fully extinguish them before going to bed.
- ✓ Do not hesitate to **call 9-1-1**

*If something feels like an emergency,  
treat it like an emergency!*
